Professional Experience

Pilo Technologies – Remote | Frontend Engineer | 2025 – Present

- Developing modern and high-performance front-end interfaces using React, Next.js, and TypeScript.
- Implementing component-driven UI architecture integrated with REST and WebSocket APIs.
- Enhancing frontend performance and accessibility to ensure seamless cross-device experiences.
- Collaborating with product, design, and backend teams to deliver highly responsive digital financial solutions.

KuvarPay – Remote

Senior Fullstack Software Engineer (Payment Infrastructure) | 2024 – Present

- Built KuvarPay, a crypto payment gateway enabling businesses to accept Bitcoin, Ethereum, and 1200+ tokens with instant fiat settlements.
- Designed real-time payment infrastructure using WebSockets and Server-Sent Events.
- Developed merchant APIs for checkouts, invoices, and webhooks.
- Integrated KYC/AML flows and automated payout processes.
- Led distributed engineering teams to ensure scalable system delivery.

Affisend.com Limited – Ogbomosho, Nigeria

Software Engineer (Email Infrastructure & Web Systems) | 2022 – 2024

- Developed and optimized responsive web platforms using React, Next.js, PHP, and Node.js.
- Architected secure, scalable email infrastructure to ensure delivery reliability.
- Configured and maintained SMTP, IMAP, and POP3 servers for performance and security.
- Mentored junior developers through code reviews and pair programming.
- Drove alignment between engineering and product goals.

Affimarts Network Limited – Lagos, Nigeria

Software Engineering Intern | Dec 2020 – Jun 2021

- Supported development of responsive websites using HTML, CSS, and JavaScript.
- Assisted in deploying WordPress-based business sites and handling basic UI adjustments.
- Provided technical support and troubleshooting for enterprise applications.

Hackathon Experience

Stablecoin Africa Event Hackathon – Lagos | 2025

- Built remittance system for crypto-to-fiat transfers using Solidity and real-time validation.

Africa Blockchain Festival Hackathon – Kigali | 2025

- Developed a multicurrency payment system on over 7 chains.
- Awarded **Second Best Product** among 128+ participants.

Key Projects

- KuvarPay – Crypto payments with real-time settlements
 - RaySwap Exchange – Currency Exchange Platform
 - Affisend Email Platform – Transactional email infrastructure
 - Ammify / YieldHub – Web3 liquidity and staking components
 - TenFigures Academy – Secure e-learning platform
-

Skills

Frontend: React, Next.js, TypeScript, JavaScript, Tailwind, HTML5, CSS3

Backend: Node.js, Fastify, PHP, REST APIs, WebSockets, SSE

Blockchain: ethers.js, Wagmi, Viem, Solana Web3, Bitcoin libraries

DevOps & Cloud: Docker, GitHub Actions, Nginx, AWS, Vercel, CI/CD

Databases: PostgreSQL, SQLite, MongoDB, Redis

Tools: Figma, Adobe CC, Canva

Education

Bachelor of Science in Physics with Electronics

Oduduwa University Ipetumodu (OUI), Nigeria – Dec 2019

First Class Honors (GPA: 4.60/5.00)

Certifications

- Python: From Zero to Hero (Udemy, 2024)
 - MATLAB Programming & Image Processing (Udemy, 2024)
 - AWS Cloud Technical Essentials
-

Leadership & Contributions

- Led teams of 3–5 engineers in fintech and blockchain product delivery.
- Mentored junior developers on best practices and scalable architecture.
- Supported cross-functional collaboration to accelerate releases.
